

SDG MONITORING

IN GERMANY AND ECUADOR WITH REMOTE SENSING AND GIS

Interdisciplinary Winter School 2022/23

Climate change can be analysed with modern earth observation methods and technologies to understand global transformation processes and the dilemmata of long-term decision making by involved (inter)national actors. The Winter School is a virtual exchange course open to Masterstudents and advanced Bachelorstudents from a variety of backgrounds including Geography, Engineering, Social Science and Archeology, interested in interdisciplinary academic research in sustainability science.

The Winter School is offered by the Faculty of Geosciences, the Faculty of Civil and Environmental Engineering and the Institute for International Law of Peace and Armed Conflict in cooperation with the Institute for Regional Studies (IERSE) and CIENER, University of Azuay, Ecuador.

VIRTUAL BLOCK COURSE 27 to 31 March 2023

REGISTRATION DEADLINE 31 December 2022
